  - Good luck to those applying for RA
  - College Room Creator – Good idea?
    - Can use it as a fundraiser on the lines of MicroFridges, Linens, Care Packages
    - They would come in and measure it and set it all up

- Depending on the room, they should have individual room. Rooms will probably be generalizations
- How much does it cost? – They could make us pay for it, otherwise they just get money from stuff that’s purchased from their website. Probably would have to work out a contract
- Do you rent it or buy it? Probably buy it
- Do we have to advertise it? – They would probably put the materials into the your housing letters
- Do they have beds loftable or can you change things around? – not sure based on the demo
- Is the company a supplier or manufacturer? – probably just a supplier, work with other companies (Target, Sony, etc)
- Could they match a lower price? – Probably not because of the commission. Cannot do linens or microfridges because we already have contracts
- Who just likes the feature of moving the stuff around in the room? – Great to be able to see how you want the room set up and make move-in day easier
- Available mid-semester? – no, probably not
- What about seeing your roommate has? – Not really necessary because you can call them or go on Facebook
- Does every resident have to do it? – They shouldn’t. It should just be a convenience. Gives a good map-plan
- Don’t need to buy stuff from the website and still be able to set stuff up in the room
- Could be a sorting nightmare for the front desk. Probably have to have a central location or have people to move stuff at the halls
- Consensus: Good idea, but need more info. Get info from schools that already have it
